INTRODUCTION

Once again it is our pleasure to present you with a copy of our new wholesale list.

In our unending efforts to serve you we are continuously seeking and practicing better methods of production. This, we believe, you will find reflected in our list. We are now operating 500 acres which enables us to offer great quantities of small landscape and cash-and-carry size material as well as heavier specimen stock. Our supply of broadleaves: items such as *Ilex Opaca*, *Aquifolium* and *Crenatas*; *Pieris* and hybrid *Rhododendron* in particular; are in good supply, of excellent quality, and we have been able to lower prices on many items. Proof of our every effort continuously directed toward developing and growing good heavy plant material offered at the lowest possible price and to merit your confidence and good will. Your patronage makes this possible and we wish to express our appreciation with a most hearty thank you.

You are most cordially invited to visit our nurseries and inspect our acreage of plant materials. Our nurseries and office are located on Route 73, three miles south of Reading, Pa. at the village of Angelica. In addition we now operate, for the past four years, a new farm on the Eastern Shore of Maryland, at Chesterville, Kent County.

Yours sincerely,

ANGELICA NURSERIES

TERMS AND CONDITIONS

This list cancels all previous quotations and prices listed herein are subject to change without notice. Material offered subject to prior sale.

All prices are f.o.b. our nurseries.

All stock when especially selected in the nursery will be sold at prices commensurate with the values of the specimens chosen.

Terms: Deposit required on all orders to be held more than 60 days. Cash in advance unless satisfactory arrangement is made when orders are placed. 2% discount allowed. To those establishing accounts with us terms are 2% 10 days, net 30 days. Interest at 6% per annum to be paid after maturity.

Plants become your property upon delivery to carrier and we cannot be responsible for loss, damage, or delay in transit.

We express or imply no warranty as to productiveness or life of stock. We assume no liability for delay or failure in filling orders due to strikes, accidents, crop failures or other causes beyond our control. It is mutually agreed that our liability for untrueness to name is confined to free replacement or refund of purchase price.

Claims must be made in writing within five days of receipt of goods.

All orders are based on the distinct understanding that the purchaser agrees to the conditions of sale as stated above.

Please use your printed business stationery in all correspondence.

DELIVERY SERVICE

We can quite often arrange to deliver full trailer load orders with our own 32' closed van, for which a reasonable charge is made. Quite often, less than trailer loads can be combined with orders consigned to the same locality.

Delivery charges are always net, due and payable when stock is delivered.

WHEN PICKING UP STOCK WITH YOUR TRUCK please be sure to send a tarpaulin or suitable covering to protect your plants from drying out on the road. We will supply labor to load your truck and during the busy planting season can arrange to load your truck in the evening or Sundays if necessary.

Ilex Convexa, 18-24"

All of our Ilex is well sheared, extremely hardy and has exceptionally good color.

Heavy sheared specimen from one of several fields (see below) of clipped specimen holly.

Ilex Convexa, 3-3½'

Ilex Convexa

Small section of several fields of heavy sheared plants. Photographed Aug. 15 on our Penna. farm.

ILEX (holly)

This year we again have exceptionally fine blocks of Ilex Crenatas. Plants are well sheared, have good color and are perfectly hardy as we have tested them over a period of years under some of the most adverse conditions. During this past winter of 1958-59 many hollies were severely damaged or killed outright. All of our holly varieties came through the long deep freeze in excellent salable condition—proof of the superiority of our strains. Volume production enables us to make these items exceptionally good buys.

AQUIFOLIUM (English holly)

English and Chinese hollies have been tested along with opaca varieties. By the same process of elimination we have selected varieties with good growth and fruiting characteristics and outstanding hardiness as well. Our stock plants have become well acclimated to Northern weather over the years giving us considerably harder strains; in many cases better than some so-called "hardy" opacas. These are exceptionally heavy plants grown in the open field. The beauty of these hollies is unsurpassed.

RHODODENDRON

HYBRIDS

1-4	5-24	25 & up
each	each	each

We are growing over 100 named hybrid varieties on their own roots. These are available in sizes ranging from liners to 5 ft. heavy field plants. Our rhododendron are grown in the open field, in full sun and are exceptionally nice: most varieties are well budded. Although we have concentrated a great deal of effort to growing rhododendron through the years, we have never had any nicer plants to offer.

If you need rhododendron, we have the best and at lowest prices. Acres of rhododendron—ready to dig. Come, see them. Order early, there's never enough to go around.
